

FLASLA Candidate for Member at Large: Leadership and Membership

Kevin B. Cavaioli, RLA, FASLA, LEED AP

Kevin has been an active member of the Florida Chapter ASLA since 1984 and was invested into the Council of Fellows in 2009. He served as Broward Section Chair and other section positions and committees before becoming Florida Chapter President in 2002. Kevin currently serves on the Chapter education committee, vendor alliance committee and assists the government affairs committee. He is a strong advocate for landscape architects viewpoints on legislative, code development and agency rule making activities on the state and local levels, and through his positions with green industry organizations.

Kevin's focus in the areas of responsibility for the Member at Large: Leadership and Membership position would be as follows:

Emerging Professionals: Identify, inform and educate this group on services and support FLASLA and ASLA provide and how Chapter support can assure rapid career growth of our profession's future leaders.

Leadership: Create a database of members in organizational leadership roles willing to mentor or partner with members seeking growth in similar areas. Demonstrate to leaders how leadership roles can lead to business opportunities.

Membership: Focus efforts in areas member surveys show services are weak and in areas directly impacting landscape architecture core competencies and business development. Improved value will improve member retention and member recruitment results.

Vendor Alliance: Continue to improve the program to maximize value vendors receive from the program by working closely with section chairs to set benchmarks for quality and quantity of events vendors can sponsor and coordinate section events with the annual conference so they are complementary.

Education:
