award – Community
Planning & Analysis–
NatureWalk at Seagrove–
2006

OBJECTIVE

To continue serving in the capacity as member-at-large for Advocacy & Licensure on the Executive Committee for Florida Chapter of ASLA

CONCEPTS & AIMS

For nearly three decades I have strived to take advantage of every opportunity afforded to me to educate the public and the legislature on the depth and breadth of our profession with particular emphasis on our discipline's unique environmental ethos and philosophical basis in stewardship of the land and environment. As the member-at large for advocacy and licensure this endeavor has included meetings with legislators, lobbyists and attorneys representing our opponents in many instances and has also involved working closely with the Government Affairs Committee (GAC) and our legislative consultants and legal counsel on numerous issues which had the potential in most instances to diminish, limit or even eliminate the scope of our practice and the legislative authority granted to landscape architects by F. S. Chapter 481, Part II. My principal aims as the GAC member-at-large for advocacy and licensure if elected to another term are to continue our efforts in this area by working in a collaborative role with the Executive Committee, GAC and our legislative team; to strengthen our position within the legislature and at the level of local governments and ordinances and to expand the practice of landscape architects among the design professions and working to ensure the continued success in the legislative arena of the past several years.
